

DELTA

LUG-NUT-LITE™ LED Third Brake Light Kit For Spare Tire Mount

P/N 01-6580-50 for Fixed Spare Tire
P/N 01-6581-50 for Aftermarket Swing Spare Tire

INSTALLATION INSTRUCTION

1. Remove your spare tire from the back of your vehicle.
2. Find power & ground wires going to the third brake light & determine which is power & ground.
3. Connect the (-) Black wire from the lug nut light pigtail to the ground wire going to the 3rd brake light using the provided blue snap-lock connector.
4. Connect the (+) White Wire from the lug nut light pigtail to the positive wire going to the 3rd brake light using the provided blue snap-lock connector.
5. Hook up the lug-nut led's to test the system before installing the spare tire.
6. Put a washer (provided) on each one of the lug studs on the jeep's spare tire mount. (to give enough space, not to fully crush the wires)
7. Feed both lug-nut light wires through the lug holes on the wheel & raise spare tire to the spare tire mount on the back of vehicle.
8. Before tightening the lugs down! Be sure to connect the wires to the lights & pull on them from the inside while tightening the lugs. (to help secure the lights in the lug hole)
9. Test the system. The Lug-Nut-Lites should go on together with your standard brake lights each time you step on brake paddle.

HAPPY FOUR WHEELIN...
