- 4 - 1/2" Flat Washers
- 4 - 1/2" Loc Washers
- 4 - 1/2" Nuts

Tools Required:

- Duct Tape.
- 3/4" Socket
- 3/4" Open End Wrench
- 3/4" Socket & Ratchet

DO NOT TIGHTEN HARDWARE UNTIL ALL HARDWARE IS IN PLACE, OR INSTRUCTED TO DO SO.

Step 1: Remove Front Bumper.

Step 2: (Photo two) locate frame mounting holes on the right and left side of the vehicle. Using the Duck Tape secure 1/2" Hex Nut to one side of the 3/4" open end wrench and slide wrench between frame and mounting bracket. Place 1/2" loc washer than flat washer over 1/2" X 3/4" long Hex Bolt. Place Light Bar Mounitng bracket in position as seen in photo three, than loosely assemble 1/2" Bolt to nut inside mounting bracket on vehicle frame. Do not tighten . Place the pastic frame cover back in position and follow the same hardware installation procedure on opposite side of the vehicle frame.

Special note: 2012 and newer models will require you to cut the plastic frame cover to fit around Light Bar.

Step 3: (Photo four), Slide the Light Bar over the tubes on the mounting brackets. Place a 5/16" flat washer onto the 5/16X 1 3/4" hex head bolts and insert bolt thru mounting holes. Place a 5/16 loc washer and nut onto bolt and hand tighten.

Step 4: With everything in place securely fasten all hardware. Place bumper back in position and refasten it to the vehicle.
