Interior Door Pull Handles for 97-06 Wrangler TJ and LJ Vehicles

Thank you for purchasing our Interior Door Pull Handles. Installation is easy and takes about 20 minutes. Please note: Door has been removed for illustration purposes. Removal is not required.

Step One: Remove 5 Torx Head Screws
Put on safety glasses. Remove the 5 Torx head T15 sheet metal screws that hold the door panel and the interior door pull handle. Retain all fasteners for later use.

Step Two: Separate Interior Panel

Gently separate the interior door panel from the door but do NOT completely remove the plastic door panel. This separation enables the factory handles to be easily removed and to allow new Quadratec Pull Handles to be installed. There are panel clips holding the interior panel to the steel door. Simply pull apart the panel with your hand and remove factory door pull as shown in Figure 2.

Step Three: Install Door Pull

Install the Quadratec Door Pull while lining up the grommet holes with the clip-on nuts on the door. See Figures 3, 4 and 5 for details.

With the new door pull in position, replace all 5 sheet metal screws that were removed earlier in Step One.
