

# INSTALLATION INSTRUCTIONS

Part No. 30410

Bug Shield

**CONTENTS:**

QTY	DESCRIPTION
1	Bug Shield
4	Mounting Screws
4	Grip Nuts and Washers

**INSTRUCTIONS:**

1. Place bug shield against grille, and align sides, top, and bottom using headlights for a guide.
2. Once bug shield is properly aligned, mark four mounting holes (one each: top and bottom of right and left outer vertical grille bar).
3. Remove bug shield. Assemble mounting bolts, lock washers and grip nut as shown in drawing through marked holes.
4. Hold screen in position on vehicle and work grip nuts into position so that edge of grip nut hooks over inside edge of grill sheet metal.
5. Using Phillips screwdriver, tighten four mounting screws securely.

**NOTE:** Although your bug shield is manufactured from high quality stainless steel, it is recommended that it be waxed or polished periodically to off-set the corrosive effects of rain, mud, and salt.
