

Installation Instructions

Part No. 30513

Remove the four screws holding the existing door latch bracket.

Before installing the new door latch brackets make sure you tighten the latch pin. Try to position this latch pin as close to that of the existing latch bracket.

We recommend that you use anti-sieze on all threads of the stainless bolts provided with your parts.

Install the new door latch bracket using the stainless screws provided with this kit.

Be sure to start all four mounting screws then tighten alternating between screws until all are tight.

If your door does not close properly re-adjust the latch pin until the door closes and latches correctly
