

Poly Performance Jeep JK Backseat Storage Bag

Parts included:

- JK Backseat Bag.
- 2x Button Snaps with self tapping screw.

4 Door JK's require no modifications to the body rail. Hardtop will require removal of the 2 center bolts (shown below) under the window - Torx bit #40.

The Backseat bag tabs will then be held in by these factory Torx bolts.

Do not over tighten the Torx bolts when installing with the hard top. Snug is tight enough!

2 Door JK's requires 1 hole to be drilled in the body rail. If using with a hardtop, you will also be required to drill a hole in the top.

From the center bolt hole below the window, The new hole will be approx. 12" forward.

Also included with the bags are 2x snaps. A pilot hole drilled in the wheel house will help with the snap install. The drill bit used can be either of these 2: 5/64th or a 3/32nd.

Installing these snaps will very depending on how the bag fits your vehicle. If you feel the bags move to much you can also use Velcro in conjunction with the snaps.
