

Also fits a wide variety of UTVs. Visit thehomeplow.com for a complete list.

P-I-Y

PLow IT YOURSELF
START PLOWING IN
3 EASY STEPS

The HomePlow™ is engineered to work with today's most popular vehicles.

The HomePlow™ easily fits into a Class-3, 2-inch front receiver hitch. It works with nearly all SUVs and light trucks.

Visit thehomeplow.com for an up-to-date list of vehicles.

Visit our website to see a video of the HomePlow in action. You'll see just how easy it is to Plow It Yourself with the HomePlow.

1. STEP ONE: EASY TO MOUNT

2. STEP TWO: EASY TO USE

3. STEP THREE: EASY TO STORE

NOW THERE'S A PLOW FOR WHERE YOU LIVE AND WHAT YOU DRIVE

If you've got a lot of driveway, a lot of snow, and just a little time, you probably wish there was a better way to clear your drive.

Plow It Yourself!

HomePlow™ by Meyer brings you the better way. The HomePlow is an easy-to-use, hardworking plow engineered for SUVs and light pickups.

Comes pre-assembled. Simply mount to your vehicle, connect the wire harness and you're ready to plow.

The HomePlow connects with Quick-Link™: An easy-to-use mounting system that slides into a Class 3, 2-inch front receiver hitch. Once the receiver hitch is installed, Quick-Link lets you attach or detach the HomePlow in under a minute with no tools. So you can clear your drive and get on your way, right away. When the plow is detached, there is no visible hardware on your vehicle.

Quick-Link™: An easy-to-use mounting system that slides into a Class 3, 2-inch front receiver hitch.*

Three models available.

Electrically-Powered Lift with Wireless Control & Auto-Angle™

The up/down motion of the moldboard is controlled by an electric power unit that is activated by a wireless key fob. The right/left motion of the plow is controlled by the HomePlow's patented Auto-Angling™ system. Unlike other snowplows, there is no need to manually adjust the blade.

Part #24000

Hydraulically-Powered Lift with Both Wireless And Wired Controllers & Auto-Angle™

Slightly faster than the electric motor version, this power option controls the up/down motion of the moldboard with a hydraulic power unit that is activated by an in-cab controller. The right/left motion of the plow is controlled by the HomePlow's patented Auto-Angling™ system. Unlike other snowplows, there is no need to manually adjust the blade. To accommodate your preference, included with this model are both the wireless and hard-wired controllers.

Part #25000

Full Hydraulic Power

For people who want full remote control of all functions, this hydraulically operated version of the HomePlow is controlled by a hydraulic power unit that directs both the up/down and right/left motion of the blade. With full power control, the driver can move the blade in the desired direction with just a push of a button. This popular version of the HomePlow is the most like a traditional commercial snowplow.

Part #26000

Auto-Angling™ Blade Movement

It even works in reverse!

You can detach the HomePlow in less than a minute, and the caster wheels make it easy to roll it to wherever you want to store it when it's not in use.

HomePlow Specs

Width:	6 Feet 8 Inches
Height:	22 Inches
