MODEL # JK- 6.5CFG
Jeep JK Wrangler KICKER Premium
" PLUG & PLAY " Upgrade Speaker System

Sound Bar Installation Instructions

1. The Kicker Upgrade Speaker System is designed to be used with the Original Factory Grills only. This gives your Jeep an O.E. look and provides maximum protection for the speakers. The speakers were shipped with the Kicker grills, which was only done to protect the speakers in shipping and can not be used in this installation.
2. Using a #15 Torx Wrench remove the speaker grill as shown in picture #1. Pay particular attention to the orientation of the grill tabs. One of the tabs is longer than the other two. The longer tab faces the center of the Jeep as shown in picture #2.
3. The speaker also has one tab that is longer than the other two as shown in picture #3. When you install the new speaker, this tab will also face the center of the Jeep as shown in picture #6.
4. Disconnect the electrical connector as shown in picture #4.
5. Plug the electrical connector into the new speaker as shown in picture #5.
6. Reinstall the new speaker paying attention to the direction of the long tab on the speaker and the grill. They both face the center of the Jeep as shown in picture #7.
