Quadratec® Modular LED Cube Light Bracket
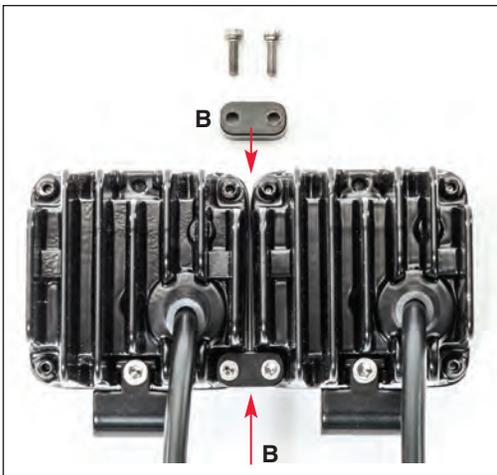

User Guide: #97109.1900

PARTS LIST:
A.) Mounting Bracket - QTY 1
    6mm Flat Washers - QTY 2
    6mm Rubber Washers - QTY 2
    6mm Nylock Nut - QTY 2
    10mm Nut - QTY 1
    10 mm Lock Washer - QTY 1
    10mm Flat Washer- QTY 1
B.) Connector Blocks - QTY 2
C.) 3mm cap screws - QTY 4

REQUIRED TOOLS:
Safety Glasses
10mm and 17mm Wrench or Socket
2.5mm Hex Key Wrench
3mm Hex Key Wrench

Multi-Light Bracket Installation:
The Quadratec Cube light mounting bracket allows you to mount two or more Cube lights side by side while still utilizing one mounting point.

Attach two Cube lights together horizontally with the two connector blocks and the (4) 3mm cap screws. Loosely thread the screws in using a 2.5mm hex wrench but do not fully tighten at this time.

The Trusted Source

Remove the two mounting feet screws with a 3mm hex wrench and remove the mounting feet from the Cube lights as shown above.

Install the mounting feet on either side of the mounting bracket with a rubber washer on the inside and a flat washer and nylock nut on the outside. Tighten the Nylock nuts loosely using a 10mm wrench or socket. Install the mounting feet and bracket back into their original location on the Cube lights with the original cap screws and tighten with a 3mm hex wrench.

At this point tighten all of the fasteners but take care not to overtighten. The bracket and lights can now be mounted and secured in place using the single mounting stud. Tighten the nut with a 17mm wrench.
