

# INSTALLATION INSTRUCTIONS

**Part No. 30494**

**Entry Guard**

Using rubbing alcohol, clean entire surface of the entry guard area.

**NOTE:** If surface is **NOT** cleaned, the 3M tape will not stick, thus voiding any warranty.

Peel off the outer tape covering from the 3M tape. Position the entry guard, making sure it is centered in the opening.

Use a rag to apply pressure to the top and side to insure correct bonding of the tape.
