IMPORTANT

THANK YOU FOR PURCHASING RIGID PRODUCTS FOR YOUR VEHICLE.

Please read through all of these Instructions and tips before proceeding with the installation. We do our best to provide a simple installation process for all applications however a professional installation is always recommended.

**Always disconnect any power sources connected to your vehicle
before servicing fuses or electrical systems.**

STEP 1

Begin by prepping the Reflect mirror assemblies. Utilizing a 7/32" hex bit, remove the pre-installed mounting clamp bases from the mirrors.

See Figure 1

FIGURE 1

STEP 2

The Reflect Flat Mount Base Kit includes all necessary hardware for installation, including a longer flat head socket cap screw to attach the new puck. Retain the unique washer for re-installation.

See Figure 2

FIGURE 2

STEP 3

Install new base as shown in Figure 3. This bolt may have to be loosened to allow rotation and clocking of the base and angle ring to allow the desired angles side to side, and relative to the vehicle for optimal appearance.

See Figure 3

FIGURE 3

STEP 4

Install the mirrors onto the A-Pillar mounts as shown in Figure 4.

See Figure 4

FIGURE 4

STEP 5

Remove upper 2 torx head bolts from side of A-Pillar, as the lights will mount using these locations.

See Figure 5

FIGURE 5

STEP 6

Install the mirror and bracket. OEM bolts will be adequate if not being used with an additional mount. If utilizing with an additional bracket, the OEM bolt will be too short, and need to be replaced with a longer M8-1.25mm bolt.

See Figures 6 & 6.1

STEP 7

The wire can be routed to the engine compartment through the door jamb and under the cowl as the most suitable location. Wire the mirror as directed in the Reflect manual.

Wiring: Wire your lights according to the instructions included with the light. Take care to avoid any heat sources and sharp or abrasive surfaces.

**Your installation is now complete.
