

BLACK-OPS SERIES

BRONCO

FRONT "A" ARM SKID
PLATES

VERIFY YOU HAVE ALL THE COMPONENTS BEFORE STARTING THE INSTALLATION. REFER TO THE ENGINEERING DRAWINGS AT THE END OF THIS DOCUMENT FOR A COMPLETE PARTS LIST

To install your new LOD "A" Arm Skid Plates, first remove the front strut mounting nuts.

Remove strut mounting nuts

Next place the "A" Arm Skid Plate in place over the strut bolts. These parts are side specific. Be sure to use the DS parts for the driver side, and PS parts for Passenger side.

Place the Bolt Guard in place over the strut bolts and reinstall the strut mounting nuts. Leave these loose while you finish the installation.

Bolt Guard and mounting nuts

The Bolt Guard is optional. Some aftermarket struts may use loose bolts in this position. If that is the case, you might be able to install the strut bolts facing up to help prevent damage and you may not need the bolt guard.

Next install the Inside Brace onto your Bronco "A" Arm. This Brace will fit inside the legs of the "A" Arm and clamp the skid plate into place and also provide additional strength.

Install the Inside Brace using the $\text{\O}3/8$ " Carriage Bolts and Washers and Nuts.

Be sure the top flange of the Inside Brace is tight against the top of the "A" Arm Legs

Once all the parts are in place, be sure to tighten all bolts and nuts securely.

ITEM NO.	PART NUMBER	DESCRIPTION	QTY.
1	4BSP2021-04	FRONT A ARM SKID PLATE - PS	1
2	4BSP2021-05	FRONT A ARM SKID PLATE - DS	1
