Bracket Installation:

Put on Safety Glasses. With the hood securely latched in place, locate the two T47 Torx bolts on both hood hinges and remove them using a T47 Torx bit and

ratchet. (it may be necessary to score the paint around the bolts using a razor blade to prevent paint chipping.)

With the Factory bolts removed install the Driver and Passenger brackets as shown with the supplied M8 T40 Torx

bolts and nylon washers. Snug but do not fully tighten the bolts using a T40 Torx bit or key.

Lightbar Installation:

While supporting the light bar parallel to the hood install the 6mm socket headed screw, lock washer and flat washer through the hole in the bracket and thread it into the light bar. Install another 6mm socket headed screw, lock washer, and flat washer into the slot on

the bracket. Continue to support the bar and repeat on the opposite side. Snug the cap screws with a 5mm hex key but do not fully tighten at this time. Fully tighten the hood fasteners at this point with a T40 bit and ratchet.

Route wires as needed. Please refer to the light bar and harness instructions provided with those components. The slots on both brackets can be used to secure the wires using the supplied zip ties as shown.

Adjust the light bar to the desired angle and then fully tighten all 4 socket headed screws with a 5 mm hex key.

J3 Lightbar installation is complete.
