

Jeep JK Wrangler Premium Dash Speaker Installation Instructions

1. Using a flat edge or small trim tool, remove the dash panel below the steering wheel as shown in picture #1.
2. Using a 10mm socket, remove the two bolts holding the steel plate below the steering column and remove the plate as shown in picture #2.
3. Using a 7mm socket, remove the 4 screws also shown in picture #2.
4. Using a 7mm socket, remove the dash screw as shown in picture #3.
5. Using a 10mm socket, remove the screw shown in picture #4. You will need to access the head of this screw by reaching your hand up under the dash.
6. You will have to remove the driver side dash panel the same as you did on the passenger side. Using a 7mm socket, remove the two screws in the side of the speaker box.
7. At this point, you can pull the bottom corner of the dash forward as shown in picture #5. Slightly tilt the top of the speaker box forward to gain access to the top screw holding in the speaker. Remove the 3 screws holding in the speaker paying attention again to the top tab on the speaker which is the long tab.
8. Unplug the old speaker and plug in the new speaker as shown in picture #6.
9. Re-install the speaker in the speaker box making sure that the long tab faces up, the same as the original that came out.
10. Reassemble driver side dash.
