Speaker Grill Installation

21.Slide Speaker Grill Spacer behind the Speaker & rotate upward, then slide against the Speaker as shown in picture #21A. Spacer should look like picture 21B when finished. Gasket should sit tight against Speaker to prevent buzzing. (Make sure foam isn't folded up from spacer)

22. Plug Dome Light Back In.

23. Install the Speaker Grills using the 5 M5 x 45mm Screws with Black Washers as shown in picture #22.

24. Start all Screws first before tightening fully. See sequence in picture #23.
