MB3056 - REAR HALF DOORS

COMPATIBLE WITH JEEP JKU

ASSEMBLY INSTRUCTIONS

MB3056 - Assembly Instructions Rear Half Doors for JKU

Preparation and Installation Guide for Your Jeep JK Rear Doors

Our new front doors is crafted from high-quality aluminum and shipped in bare metal. To achieve the best possible finish and ensure a flawless fit, we recommend the following procedure:

1. **Initial Fitting:** Before painting, assemble all components to ensure they fit perfectly on your Jeep JK Rear Doors. This step is crucial to avoid adjustments post-painting that could damage the finish.
2. **Disassembly and Cleaning:** Once you confirm the fit, disassemble and thoroughly clean all parts to prepare them for painting.
3. **Professional Painting:** For a superior and durable finish, we advise having the door parts professionally prepared and painted by a reputable auto body shop. This ensures the paint is perfectly matched and applied evenly.
4. **Final Assembly:** After painting, reassemble the parts for the final installation. This process ensures all components align correctly and maintain their pristine condition.

Additional Recommendations:

By following these steps, you can enhance the aesthetics and functionality of your Jeep JK Rear Doors with confidence that the finish and fit are of the highest quality.

To further protect your investment, consider adding a non-slip marine grade flooring material to the removable interior panel.

ASSEMBLY - STEP 1

HINGE NOTE:

Hinges are designated for top & bottom, as well as, Driver & Passenger sides.

MB3064-JKT = Driver Side TOP

MB3064-JKB = Driver Side BOTTOM

MB3064-JKT_MIR = Passenger Side TOP

MB3064-JKB_MIR = Passenger Side BOTTOM

Repeat hinge assembly on Passenger side door.

Loosely assemble hinges. Do NOT fully tighten. You will set the door gap & align the doors in a later step.

ASSEMBLY - STEP 8

FINAL ASSEMBLY & ADJUSTMENT

1. Ensure hinge bolts are loose
2. Place assembled half door on vehicle door hinges
3. Close the door & view the door from the side of the vehicle
4. Adjust the door to ensure there is an even reveal & gaps from left to right & top to bottom
5. With the door remaining closed, tighten the hinges bolts
6. Open the door & adjust the rotary latch fasteners as well as the rubber bumper so that the door latches smoothly & the door sits flush with the outer body
