Connect your fog lights to your vehicles harness. (FIG13) Factory Fog lights will require a Quadratec extension harness sold separately. Items #97109.0914 ('07-'10) or #97109.0915 (2011-Current).

### QRC JK Front Bumper Care:

Your Bumper has been designed and manufactured to provide years of use. However, like any product, general maintenance is required to keep it looking new.

Since the bumper is located on the front of the vehicle, it is subject to potential rock chips and other debris potentially causing portions of the paint to chip off. We recommend using a textured or gloss black spray paint sprayed on a piece of cardboard and Q-Tip to gently fill in these chips. This will prevent any rust from forming.

On all bumpers there is a chance of some surface rust showing over time due to metal particles being embedded in the paint. This surface rust is easily removed by a non-abrasive cleaner/polish and a soft bristle brush (not a metal brush!).

For bumpers with a textured finish, wash only with soapy water and avoid other waxes and polishes.
