

Hello and Welcome to the family!

You are currently looking at a picture of Feldberg Mountain, the highest mountain in the Black Forest, located in Germany just outside the Alps. You may also be wondering why this has anything to do with your purchase of your new Black Forest FF31 Fridge Freezer. We thought it was really cool wanted to take a moment to show you the inspiration behind our name and an example of the beauty that we hope you see on the adventures you take with your new Black Forest purchase. Please share your adventure with us at [Facebook.com/BlackForestGear](https://www.facebook.com/BlackForestGear).

**TURN OVER FOR SOME QUICK TIPS FOR YOUR BLACK FOREST FF31 FRIDGE FREEZER.**

# QUICK TIPS

## FF31 FRIDGE / FREEZER - 31 QT

In addition to the installation instructions you have received with your purchase of the Black Forest FF31 Fridge Freezer, our team has put together some “quick tips” that we have learned along the way. Who wants to read all of those instructions anyway? Look at it as your very own cheat sheet.

### Quick Tip #1

There is a switch located on the lower back part of your Fridge Freezer unit, set the switch to Medium for optimum use.

### Quick Tip #2

To switch from Celsius to Fahrenheit, push and hold both of the “up and down” buttons for 5 seconds.

### Quick Tip #3

From our experience, the most desired temperature for beverages (of any kind) is 34°F. If you have a plan to bring ice cream or any other frozen treat on your trip, go ahead and set the temperature to 0°F.

### Quick Tip #4

If your vehicle is running, use the Fridge Freezer on MAX mode, otherwise leave on ECO mode. BONUS! Yes, you can leave your fridge running even when the vehicle is off. We built in a smart sensor to shut off the Fridge Freezer to protect the vehicle battery, saving enough power to start the engine when you are ready to get moving again.

### Quick Tip #5

For planned trips, pre-chill your Fridge Freezer and drinks in the house while packing up! Not necessary, but helpful.
