FRONT SUN SHADE

FULL SUN SHADE

REAR SUN SHADE

REQUIRED TOOLS

Help of a Friend

KIT CONTAINS

- Sun Shade
- Small Bungee
- Medium Bungee
- Large Bungee

JL/JLU Wrangler & JT Gladiator Front, Rear, & Full Sun Shades

1) REMOVE FREEDOM TOP/HARD & SOFT TOP

Begin removing your Freedom Top panels and Hard/Soft Top covers. *This isn't required, but it will make the installation of the bungee cords very difficult.

Begin planning where you will need to wrap the cords. All shorter bungees are used on the sides, while the longer bungees are for corners and the sport/sound bars. Remove anything that may get in the way during installation.

2) INSTALL

Begin attaching the shade so that the logo patch faces down. The Full Shade will have the logo facing up. The Front Shade can be oriented in any way, but the Rear and Full Shades are directional. The angled corners in the Rear Shade face toward the front of the vehicle, and the holes in the Full Shade go over the Freedom Top pins in the sound bar.
