Removal or modification of the fender flair extension may be required when installing the rocker guard(#12004.3202) BUT NOT THE SIDE ARMOR (#12004.3212). (Figure 1)

Locate the areas of the frame that are in front of the front body mount and behind the rear body mount as shown. (Figure 2)

Step 3:

Rear Frame Section

Once the guards have been positioned properly you will need to trace the mounting holes of the front and rear brackets against the frame with a paint pen or marker as shown. (Figure 4)

Product Care and Maintenance:

Your Rocker Guards have been designed and manufactured to provide years of use. However, like any product, general maintenance is required to keep it looking new.

Because the guards are located on the underside of the vehicle, they are

subject to potential rock chips and other debris potentially causing portions of the paint to chip off. For touch ups, we recommend using a textured black spray paint sprayed on a piece of cardboard and cotton swab to gently fill in these chips. This will prevent any rust from forming.
