a The center mounting brackets for the 59000 are identical to the outer mounting brackets shown below. There are a total of four (4) mounting holes instead of six (6). The tolerance on 59000 dimensions is  $\pm 1/2"$ .

b 59012 AND 59017 are Center Hoop only configurations with the two center mounting brackets positioned as shown in the figure below.

c Height is measured from the mounting surface to the highest point of the Brush Guard. Depth is measured from the rear mounting bracket to the front-most point of the Brush Guard. Due to manufacturing variations, the Height and Depth dimensions are approximate and may vary slightly.
