# XAV-AX200 16.3 cm (6.4") DVD receiver with Bluetooth®

Double Din DVD receiver with 16.3cm (6.4") touch screen, voice control with Apple CarPlay and Android Auto $^{\rm TM,1,2}$ 

# **Bullets**

- Connect to your smartphone with Bluetooth®3
- Voice control with Apple Car Play and Android Auto™
- Control and view everything with the 6.4" touch screen
- Play video anywhere from the built-in DVD player
- Get powerful sound with the 4 x 55W Dynamic Reality  $\ensuremath{\mathsf{Amp}^4}$
- Create virtual speakers on your dashboard with the Dynamic Stage Organizer
- Ergonomic rotary dial for distraction-free operation

- USB playback supports MP3/WMA/AAC/WAV/FLAC<sup>5</sup>
- SiriusXM<sup>™</sup> Satellite radio ready<sup>7</sup>
- 10-band equalizer lets you customize your sound
- Three pre-outs let you expand your sound system
- Three-rear camera input ready
- Steering wheel control ready input<sup>6</sup>
- Convenient wireless remote supplied
- External hands free mic supplied

# Features

# Apple CarPlay makes driving smarter<sup>1</sup>

Use all your essential iPhone functions on the road, with Apple CarPlay. Connect your phone via cable, and you'll see a familiar interface displayed clearly on screen. Tap the icons to take calls, check voicemails and text messages, or bring up maps. And of course, listen to your favorite songs using iTunes, Apple Music or installed apps. Apple CarPlay even lets you talk to Siri to control everything using voice commands. You can dictate text messages, control music playback or get directions, without ever taking your eyes off the road.

### Android Auto<sup>™</sup> gives you all the help you need<sup>2</sup>

Journeys are easier and safer with help from Android Auto. Connect your Android phone via cable to get traffic information, lane guidance, and real-time navigation assistance from Google maps. You can even send text messages, take calls or check your voicemail through the simple interface. Android Auto also includes best in-class voice recognition technology, so you can control everything just by speaking. Get directions, send messages, make calls and control music while keeping your hands safely on the wheel.

### Control and view everything with the 6.4" touch screen

See everything clearly on the 6.4" (16.3-cm) screen. Responsive touch controls mean you can bring up maps, sort through playlists, and make phone calls—all with just a quick tap

### Integrated Bluetooth® technology<sup>3</sup>

Easily take calls and listen to your favorite tunes with Bluetooth® 3.0 technology.<sup>3</sup>

### Play video anywhere

Whenever your car isn't moving, enjoy your favorite movies and TV shows with the built-in DVD player

### 4 x 55W amplification for clear, powerful sound<sup>4</sup>

The Dynamic Reality Amp 2 gives you 4 x 55W<sup>4</sup> of power, so you can play music as loudly or softly as you like. The amp has 47% less internal resistance than conventional units, for increased output and clear, natural sound at any volume.

# 10-band equalizer lets you customize your sound

Hear your music the way you want to, with the built-in graphic equalizer. Cut and boost ten different frequencies for unlimited sound sculpting options.

### ExtraBass adds low-end power

Activate ExtraBass at the touch of a button for an instant, low-end boost and illuminations that pulse in time with the beat. Unlike conventional bass boosters, Mega Bass minimizes distortion at all volume levels by automatically adjusting frequency and gain to their optimal positions.

# Expand your sound system

With three high-voltage pre-outs, you can easily expand your system with power amplifiers to drive speakers and subwoofers.

### Dynamic Stage Organizer creates virtual speakers on your dashboard

Enjoy authentic-sounding music from any setup, thanks to the Dynamic Stage Organizer (DSO). If your speakers are positioned in your doors, the sound they produce may be affected. DSO re-calibrates their frequency output, making music sound as if it is coming from speakers on your dashboard.

# USB playback supports MP3/WMA/AAC/WAV/FLAC<sup>5</sup>

Multi-format playback lets you play your MP3, WMA, AAC, WAV or FLAC files from an MSC & MTP compatible USB device.<sup>5</sup>

# Rotary dial for distraction-free control

The ergonomic rotary dial gives you easy access to helpful functions on the road. Turn it to adjust volume, or push the integrated button to access sound control menus. Alternatively, hold the button to use voice control commands.

### Three-rear camera input ready

Got a rear camera installed? View its feed through the screen, along with customizable guidelines that help you back in safely. Now you can see the image of the three connected cameras that you can choose on screen.

# SiriusXM<sup>™</sup> Satellite radio ready<sup>7</sup>

The on-board SiriusXM<sup>™</sup> connector simplifies satellite radio installation by eliminating compatibility issues and providing direct connection to the latest platform of tuners.<sup>7</sup>

### Steering wheel control ready input<sup>6</sup>

This receiver is compatible with aftermarket remote control adapters designed to utilize the vehicles existing, primary radio controls directly from the steering wheel. The 1/8" rear panel mounted remote input jack allows for simple connectivity.<sup>6</sup>

### External hands free mic supplied

The included external hands-free microphone and integrated echo and noise canceling circuitry assure your conversations are clear.

### Convenient wireless remote supplied

Control your receiver with the included wireless card remote (RM-X170).
