2018+ Jeep® JL Wrangler & 2020+ JT Gladiator Bull-Bar For Factory Modular Steel Bumper

1) REMOVE THE BUMPERS BOLTS

With a 3/8" ratchet, ratchet extension, and a T45 torx bit, remove the 6 bolts located on the top of your Jeep's factory front bumper. Set your bolts aside.

2) INSTALL YOUR BULL-BAR

Hold your bull bar up to your front bumper, making sure the bolt holes align.

Once you have your bull-bar set in place, screw in the bolts with a T45 torx bit. Make sure your bull bar is centered with your bumper before fully tightening the bolts into place.
