2007-2017 Jeep® JKU Wrangler Door Entry Guards (4-Door)

1) PREPARE

With vehicle paint safe cleaners and cloths, clean your vehicle's entry ways free of dirt and debris to help with the installation.

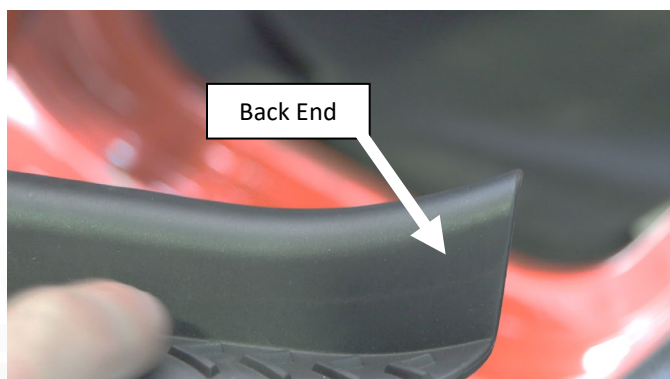

For the rear entry guards, the ridged area should face the front end and the curved end should line up with the rear end of your entry way.

2) REMOVE THE TAPE BACKING

The proper placement of each entry guard is indicated by its distinct features. For the front entry guards, the rectangular nub and raised end of your entry guard should be facing the front end of your vehicle.

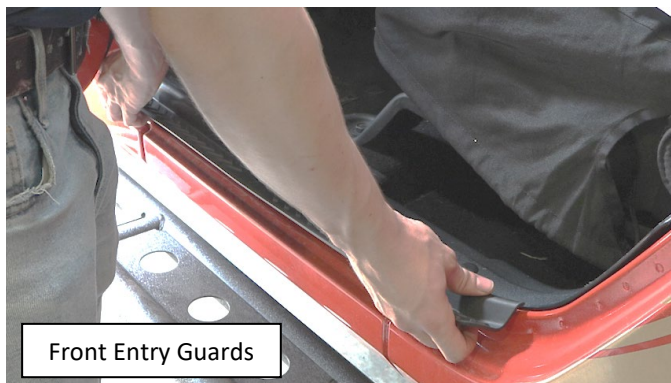

Pull away the adhesive backings located on the bottom and back end of your entry guards.

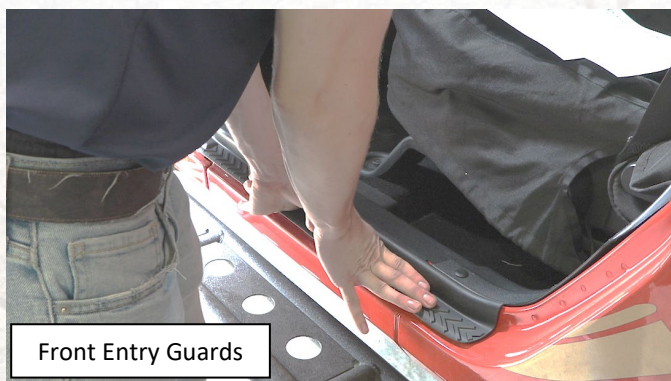

2007-2017 Jeep® JKU Wrangler Door Entry Guards (4-Door)

3) **INSTALL**

With a steady hand, line up the back end of your entry guards with the curve in your entry way.

Once you've got your entry guard in place, press down firmly, securing it into place. Repeat on the opposite side.

4) **ENJOY YOUR NEW FISHBONE ENTRY GUARDS!**
