### 2007-2017 Jeep® JK Wrangler Door Entry Guards (2-Door)

**1) PREPARE**

With vehicle paint safe cleaners and cloths, clean your vehicle's entry ways free of dirt and debris to help with the installation.

Pull away the adhesive backings located on the bottom and back end of your entry guards.

**2) REMOVE THE TAPE BACKING**

The proper placement of each entry guard is indicated by its distinct features. The rectangular nub and raised end of your entry guard should be facing the front end of your vehicle.

**3) INSTALL**

With a steady hand, line up the back end of your entry guard with the curve in your entry way.
