Included:	Qty.
Front door	1
Body front	1
Body rear	1
Sliding Tray	1

Sheet metal screws	4
Machine screws	4
Felt pads	2
Long sheet metal screws	2

Please read all instructions before beginning assembly

STEP 1

A) Install the two strips of felt on the underside of the head unit as protection for the items carried in the tray when on rough terrain.

B) Install Radio into Body Rear section of mount with four sheet metal screws as shown. Leave slightly loose to allow adjustment in the next step.

NOTE: some head units will have different fasteners on the side of the case and should come with the appropriate fasteners, use the appropriate fastener for the installation. Included in this kit are two lengths of fastener to aid installation. Use the shortest screw possible to ensure no damage to the head unit internally.

STEP 2

A) Install any cords as desired into the sliding tray and insert it into the assembly from step 1 as shown. (See below for cord detail)

B) Install the front body section onto the "step 1 assembly using the four small machine screws. **NOTE:** Be sure the bottoms of the front and rear sections are flush.

C) Now adjust the final position of the radio into the assembly and tighten the screws on the sides. Position so it is far enough forward to be easily accessible but not interfere with the face when installed.

NOTE: Insert the desired cord as shown to keep it from falling out of the drawer and becoming unreachable inside the vehicle dash.

Complete assembly

Installation

STEP 3

Carefully insert screw driver under edge of dash panel as shown using a towel to protect the surfaces from damage. Pry up the clips across the top of the dash and move the panel out of the way to access the screws for the top of the radio surround.

STEP 4

Use a Philips screw driver to remove the two screws under the dash panel holding the top of the radio surround.

Step 5

Use a flat head screw driver to pry the base of the radio surround loose and remove it. Wrap the screw driver in a towel to protect the surround.

Step 6

Remove the four screws holding the factory radio in place and remove it. Be careful not to damage the wiring when unplugging the harness.

Step 7

A) Install the completed radio assembly into the dash using the factory mounting locations and hardware.
NOTE: Follow the radio manufacturers instructions for wiring requirements.

B) Re-install the radio surround by pressing the clips into the locations on the dash.

C) Re-install the dash top by pressing the clips into the locations on the dash.

OPERATION

Once face is installed use key to lock in place. Be sure lock is in open position before installing, do not force face assembly in place. If not properly aligned the face may become difficult to lock or remove.
