Description: **Fridge / Freezer (FF31) Slide Installation**

INSTALLATION INSTRUCTIONS

The slide assembly must be secured with a minimum of 6 equally spaced mounting bolts across the base frame. Depending on the mounting surface, the slide can be secured using self-tapping screws or nuts and bolts through the mounting holes located along the base frame.

IMPORTANT

Install the fridge only after the slide has been secured into position.

Steps:

- Place the slide assembly into the mounting position with the release handle facing outward or towards the opening position.
- Extend the slide assembly slowly by rotating the release handle in a counter-clockwise direction until tray is released.
- Commence installing the fasteners starting from the rear and moving forward using the 6 retaining holes.
- If the slide tray does not move smoothly, ensure the mounting surface is flat and all mounting hardware is tightening equally.
- When all fasteners are in place, slide installation is complete.

OPERATION

Rotate the handle counter-clockwise and pull to open.

WARNING

Secure the Frig / Freezer to the slide assembly before slide tray use. The slide assembly maximum load is 220 lbs. (100 Kg.)
