Cut out the Template below along dotted lines and use to install the 312 / 1312 Flush Mount Bezel:

1. Align and securely tape the cut template to the mounting surface where the lights will be mounted.
2. Center punch each of the four 1/4" bolt holes on the template.
3. Using a marker, outline the round hole that will be cut out from the mounting surface, then cut out.
4. Drill the four 1/4 bolt holes that were previously punched.
5. Mount the light(s) using the supplied Flush Mount Bezel and Hardware.
6. Securely tighten all hardware once lights and wiring are installed.
