1

Remove bolts (1,2,3) from the lower A-pillars.

2

Bolt the driver side portion of the mount to the lower A-pillar holes (3) and tighten.

3

Walk around to the passenger side of the vehicle, fasten the mount using the 3 bolts to the A-pillar holes (before inserting into the other end of the mount).

4

Lightly lubricate the inside of the mount tube with WD-40 or dishsoap. Carefully join the male end of the light bar mount with the female end. Install your chosen lighting and run wiring per the manufacturer's recommendation.
