

Sherpa Rollbag Installation Instructions

The Sherpa Rollbag can be installed in many places in most Jeeps; installation is simple – wrap the straps around the roll bar, pass the end of the strap through the cam buckle, pull tight, and close the cam buckle.

The straps are long enough for most applications, but may be too long for thinner roll bars. D-Rings are provided on the straps to hold any excess strap length – the excess strap can be folded up and stored in the D-ring as shown at right.

The straps can also be cut if you won't have any future need for extra length. They can be cut with scissors, and we recommend using a match to seal the cut end. The straps are synthetic and the flame will melt the loose threads to prevent unraveling.

Sherpa Rollbag Care Instructions

The Sherpa Rollbag is made from heavy cotton duck canvas fabric and leather and is designed to give years of service on the road and trail. Canvas is very easy to clean and handle - a soft and dry bristled brush can be used to remove any loose dust or dirt.

If the canvas needs further cleaning, mix clean water and a small amount of mild detergent and use a damp towel or bristled brush dipped in the solution and scrub or rub the dirty areas gently. Lightly spray the canvas area with water to remove the soap residue and dry with a towel.

To keep the Sherpa Rollbag looking new longer, we recommend treating the fabric with Scotchgard Auto Fabric & Carpet Protector. Scotchgard provides excellent resistance to water, oil and stains and it doesn't change the look and feel of the fabric, so the fabric stays soft and colors stay true. Scotchgard comes in an easy-to-use spray bottle.

Note: Do not Dry-Clean, bleach or put in the dryer as these may potentially discolor the canvas.
