Instructions for use: #91083.4201

CONTENTS:

Quadratop Zip Slick™ ½ Oz. (14g)
Quadratop Soft Top Repair Tape Clear
Quadratop Soft Top Repair Tape Black
Isopropyl Alcohol Prep Pads (2)

REQUIRED TOOLS:

Scissors (for trimming of tape)

Zip Slick™ Directions:

Quadratop Zip Slick™ ½ oz. (14g)
Protects and Lubricates Soft Top Zippers.
Contains UV and corrosion Inhibitors.
Contains no silicone or paraffin.

Specially formulated to provide heavy-duty lubrication and protection. Inhibits rust and resists corrosion. Keeps zippers smooth and easy to open and close.

Directions: Prepare by making sure the zipper is clean and free of sand, dirt and debris.

Apply: Open zipper and apply Quadratop Zip Slick Lube sparingly to the outer teeth of the zipper. Distribute Quadratop Zipper Slick by closing and opening zipper until zipper moves freely. Wipe away any excess. Reapply periodically, and prior to storage, to prolong zipper life.

Repair Tape Directions:

Quadratop Soft Top Repair Tape: 20" x 3"
Clear (for window repair) and black (for fabric repair).

Tape facilitates an ultra-strong repair.
Maximum strength adhesive, Sticks to almost any surface.
Will not leave a sticky residue if removed within 72 hours

Directions:
Prepare by cleaning the damaged area with isopropyl alcohol.
Trim any loose threads. Cut patch with rounded corners to
overlap damaged area by at least 1"

Apply:
Peel off backing and apply to damaged area. Apply pressure
from center out to eliminate air bubbles. For large holes,
apply matching patch to opposite side of material.
Adhesive will continue to strengthen over time.

In the event of an unrepairable soft top:
Emergency tape repairs are meant to be temporary.
For a more permanent solution, Quadratec recommends a
new soft top. Quadratec.com has a complete line of upgrade
and factory style replacement soft tops from the finest brands
in the industry. We offer choices for every budget.
