

4.5INCH 30WATT JEEP LED FOG LIGHTS WITH ACCENT WIRING DIAGRAM & INSTRUCTIONS

01E771

2PCS PER SET

Thank you for purchasing our LED replacement fog lights and improving the safety of your vehicle and the safety of the occupants inside! Instructions and videos can be found online how to install replacement fog lights into your specific vehicle. We have designed these LED replacement fog lights to be as easy as possible to install. At Quake LED, we always suggest you leave it to the professionals and have a qualified Quake LED technician install and aim your new fog lights into your vehicle.

Quake LED replacement fog lights will only operate on 12 Volts DC! Most passenger and off-road vehicles are 12 Volts DC, but if you plan to install these in your grandfathers M1 Abrams Tank, you should check the operating voltage before doing so.

If you are feeling up to the task and willing to spend the time to remove your stock fog lights, please read onward. Fog lights are designed differently from one vehicle to another. We suggest you research your vehicle before opening the hood.

Our 4.5 Inch LED replacement fog lights come with a plug and play female end waterproof connector (#1) that you connect to your vehicles existing wire. We also include a 8 inch pig tail wire (#2) that has a mating male waterproof quick connect in case you want to install on a vehicle that does not have a quick connect

Now that you have your new Quake LED replacement fog lights installed, wires routed and wire connectors assembled, it's time to download and install the Android or iPhone App in order to control your RGB colors and functions. You will need to use the App to scan for the fog lights in order for the App to control the headlights. Scan the QR Code that will work with your smart phone.

Once you successfully scan the QR Code, a new window will automatically open and confirm that you want to download the App from the App store. Click yes and allow the app to download to your phone. After successfully downloading the App, turn on your smart phone Bluetooth function and open the App.

-Wire Diagram is for Illustration Only.
-Actual wire harness lengths and wire gauge are not to scale.
-Actual wire harness components are not to scale.

4.5INCH 30WATT JEEP LED FOG LIGHTS WITH ACCENT WIRING DIAGRAM & INSTRUCTIONS

2PCS PER SET

1 BLUETOOTH ON

Bluetooth Accent Controller must be switched on

2 TURN APP ON

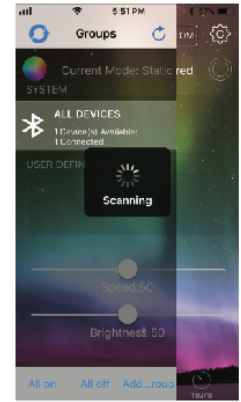

Open the App on your smart phone

3 SCANNING

Wait while it automatically scans for the controller

4 CONNECTED

Once found, it will automatically connect

The real fun begins when you have successfully connected the App to the fog lights. Now you can pick and choose which colors you want your fog lights to accent and you can program your own colors.

6 MODE MENU

Choose colors, adjust speeds and adjust accent brightness

7 COLOR MENU

Custom pick your accent color and brightness

8 MUSIC MENU

Sync accent colors to your music

9 DIY COLOR MENU

Create and save your own colors and effects

10 TIMER MENU

If your controller is wired directly to your battery, use a timer to turn on and off your accent lights.

Play around with the timer function first and get familiar with the timer setting before leaving your vehicle's accent lights on unattended. (you might come back to a dead battery)

11 SETTINGS

Go to the settings menu to change your skin graphic, pick some flash effects and read more instructions

Enjoy!
