

**RIGID SERIES SKID PLATE
FB-SP-100-JK**

QTY	DESCRIPTION
1	Skid Plate
3	Screw Nut
3	3/8"x1" Bolt
3	3/8" Washer

*If any parts listed are missing or damaged please call Rock-Slide Engineering @ 435-752-4580 prior to installation.

INSTALLATION INSTRUCTION RSEI 112

NOTE: This skid plate is specifically designed to attach to the Rock-Slide Engineering RIGID Series JK Bumper.

1. Push the screw nuts onto the three holes on the bottom of the bumper until the holes line up. The threaded end of the nut screw nut faces upward

2. Place the skid plate with bolt holes against the bumper and so the skid plate is hanging down. Put washers on the bolts and insert bolts into their respective holes. Tighten bolts

Thank you for choosing Rock-Slide Engineering products. We value your business and welcome your feedback/suggestions. If you have any concerns please contact us directly @ 435-752-4580. We are here to help you!
